

Fragment

```
classDiagram
    class Fragment
    class ScreenSlidePagerAdapter
    class DownloadProductTask
    class ScreenSlidePagerActivity

    ScreenSlidePagerAdapter --|> Fragment
    DownloadProductTask --|> ScreenSlidePagerAdapter
    ScreenSlidePagerActivity ..|> DownloadProductTask
```

The diagram illustrates the following structure:

- Fragment**: The base class at the top, represented by a rectangle with three horizontal compartments.
- ScreenSlidePagerAdapter**: A class that inherits from **Fragment**, indicated by a solid line with an open arrowhead pointing to **Fragment**. It is represented by a rectangle with three horizontal compartments.
- DownloadProductTask**: A class that inherits from **ScreenSlidePagerAdapter**, indicated by a solid line with an open arrowhead pointing to **ScreenSlidePagerAdapter**. It is represented by a rectangle with three horizontal compartments.
- ScreenSlidePagerActivity**: A class that has a dashed association with **DownloadProductTask**, indicated by a dashed line with an open arrowhead pointing to **DownloadProductTask**. It is represented by a rectangle with three horizontal compartments.
